China

China, a vast and enchanting country in East Asia, is a land of incredible contrasts. With a history dating back thousands of years, it is home to some of the world's most iconic landmarks and a treasure trove of cultural wonders.

One of China's most renowned features is the Great Wall, a colossal structure built over centuries to protect against invasions. Stretching over 13,000 miles, the Great Wall winds its way through mountains, deserts, and grasslands. It is a testament to the ancient Chinese people's engineering prowess and determination.

China's rich history is also evident in its ancient dynasties, such as the Xia and Shang, and its contributions to art, philosophy, and science. The Terracotta Army, an archaeological marvel discovered in the tomb of China's first emperor, Qin Shi Huang, showcases the intricate craftsmanship of ancient Chinese artisans.

In contrast to its historical wonders, China is a powerhouse of modern innovation. Cities like Beijing and Shanghai boast futuristic skylines, high-speed trains, and cutting-edge technology. The country's rapid development has made it a global leader in various fields, from space exploration to renewable energy.

Chinese cuisine is a culinary delight, with each region offering its own unique flavors and specialties. From the savory Peking duck of Beijing to the spicy noodles of Sichuan, Chinese food is a feast for the senses.

China's natural beauty is equally captivating. The Yangtze River, the third-longest river in the world, meanders through diverse landscapes, including towering mountains and lush valleys. The karst mountains of Guilin, with their surreal limestone formations, add another layer of breathtaking scenery.

In addition to its cultural and natural treasures, China is known for its commitment to conservation. The giant panda, a national treasure, symbolizes China's dedication to protecting its unique biodiversity.

Name: _____

Reading Comprehension

Read the text and answer the questions.

China

1. What is the Great Wall of China, and why was it built?

2. Name two modern cities in China.
